

Custom Print and Apply Carton and Pail Labeler

INDUSTRY

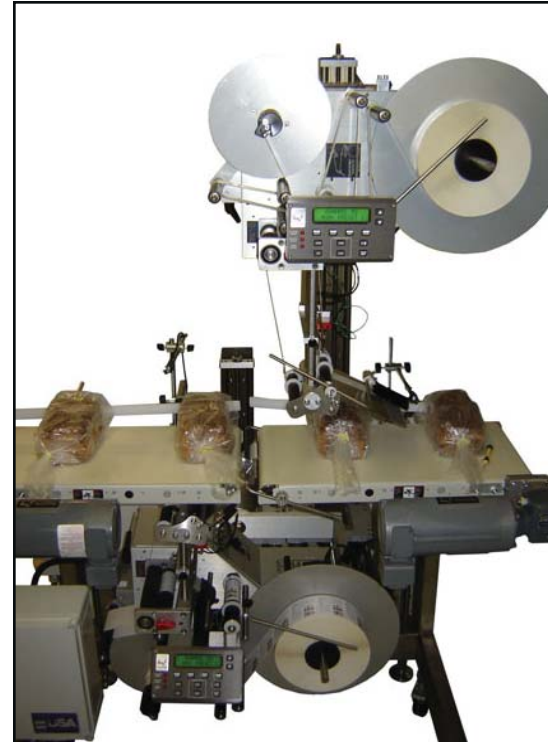

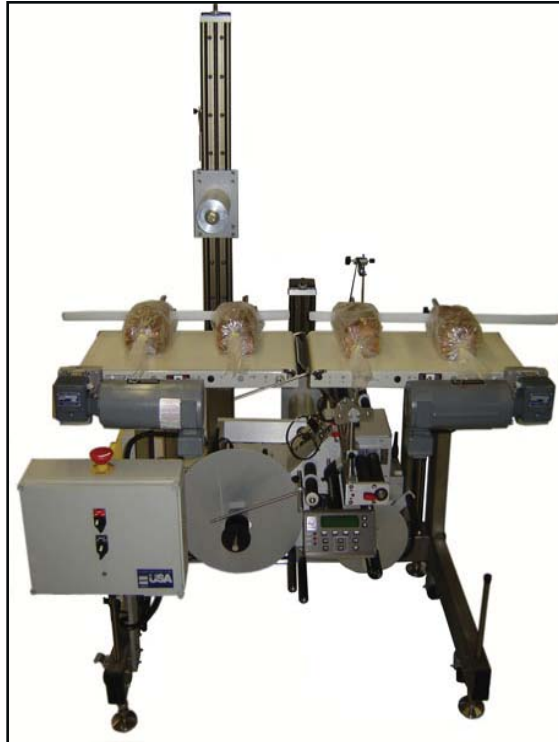

Food Packaging
Meat & Poultry Packaging
Cheese & Dairy Packaging
Consumer Goods Packaging

PRODUCTS

Wrapped Bread

PRODUCTION RATE

Up to 60 ppm

These integrated labelers feature Quadrel's high speed Q65 wipe-on label applicators. Products are conveyed on a dual split belt, food-grade conveyor with a powder coated carbon steel frame.

Products are transferred onto the conveyor, aligned by guide rails and the wipe-on applicators apply labels to the tops and bottoms of each product at 60 ppm with +/- 1/32" applied accuracy.

The system shown on the left is used for bottom apply only but an additional head support was added to provide flexibility for future use of a top apply labeler.

The labelers are ideal for various containers including clam shell, blister packs and bagged products such as baked good, meats and prepackaged salads, etc.

Quadrel also offers a dual side belt system for labeling more unstable products.
